**Creating Awareness about preventive interventions for  
reducing transmission of Novel Coronavirus disease**

***Creating awareness among school children about  
preventive interventions such as:***

**frequent hand wash, respiratory etiquettes (using handkerchief over mouth while coughing/ sneezing, use of tissue paper or using the sleeve of shirt covering upper arm, staying away from school when sick, avoiding public gathering etc.) will help in preventing/ reducing transmission of not only this disease, but also large number of other communicable diseases, notably flu like illness. Further, such informed children can be agents of change for their family, community and beyond. In view of the above, you are requested to take initiatives to teach children these.**
